IHS Data Extract to NDW Process Flow

- Site source system creates Data Export and sends file to the NDW.
- When the file arrives, NDW checks the file and sends an acknowledgment email to the site.
- The NDW processes and loads the data into the NDW database and emails a post load report to the site.
- The NDW Export Tracking intranet web site provides detailed information related to data loads.

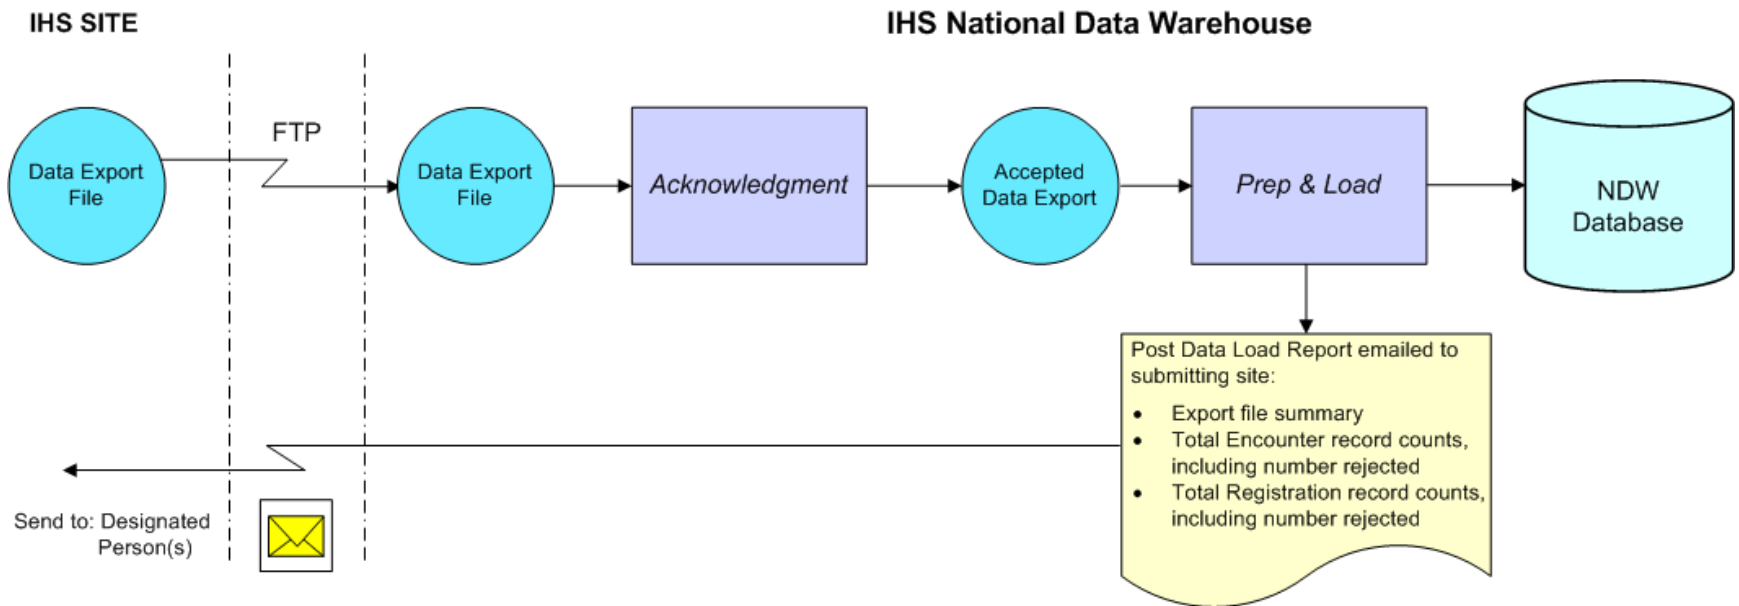

- The Site contact should receive an Acknowledgment email within 24 hours (normal workweek).
- If an email notification does not arrive within the expected time, the Site contact should check the status of the Data Export file by emailing:

NDW-ACKREPLY@ihs.gov

Note: send any contact updates to this email address.

Example of Acknowledgment Email

```
* DATA WAREHOUSE *  
NDW Data Transmission Log Report  
Data Received Date: Mar 23, 2007  
  
For more information please send an email to: NDW-ACKREPLY@ihs.gov  
  
Export ID: 5789  
Export file name: 5852813070323061526.BDW  
Static ASUFAC of exporting box: 585281  
Beginning Date: Feb 23, 2007  
Ending Date: Mar 22, 2007  
Run Location: COUSHATTA HEALTH CENTER  
Transmission Status: No errors detected  
Total Number of Registration Records Received: 14  
Total Number of Encounter Records Received: 257
```

- Actual load date may vary, depending on scheduling.

Example of Post Data Load Report

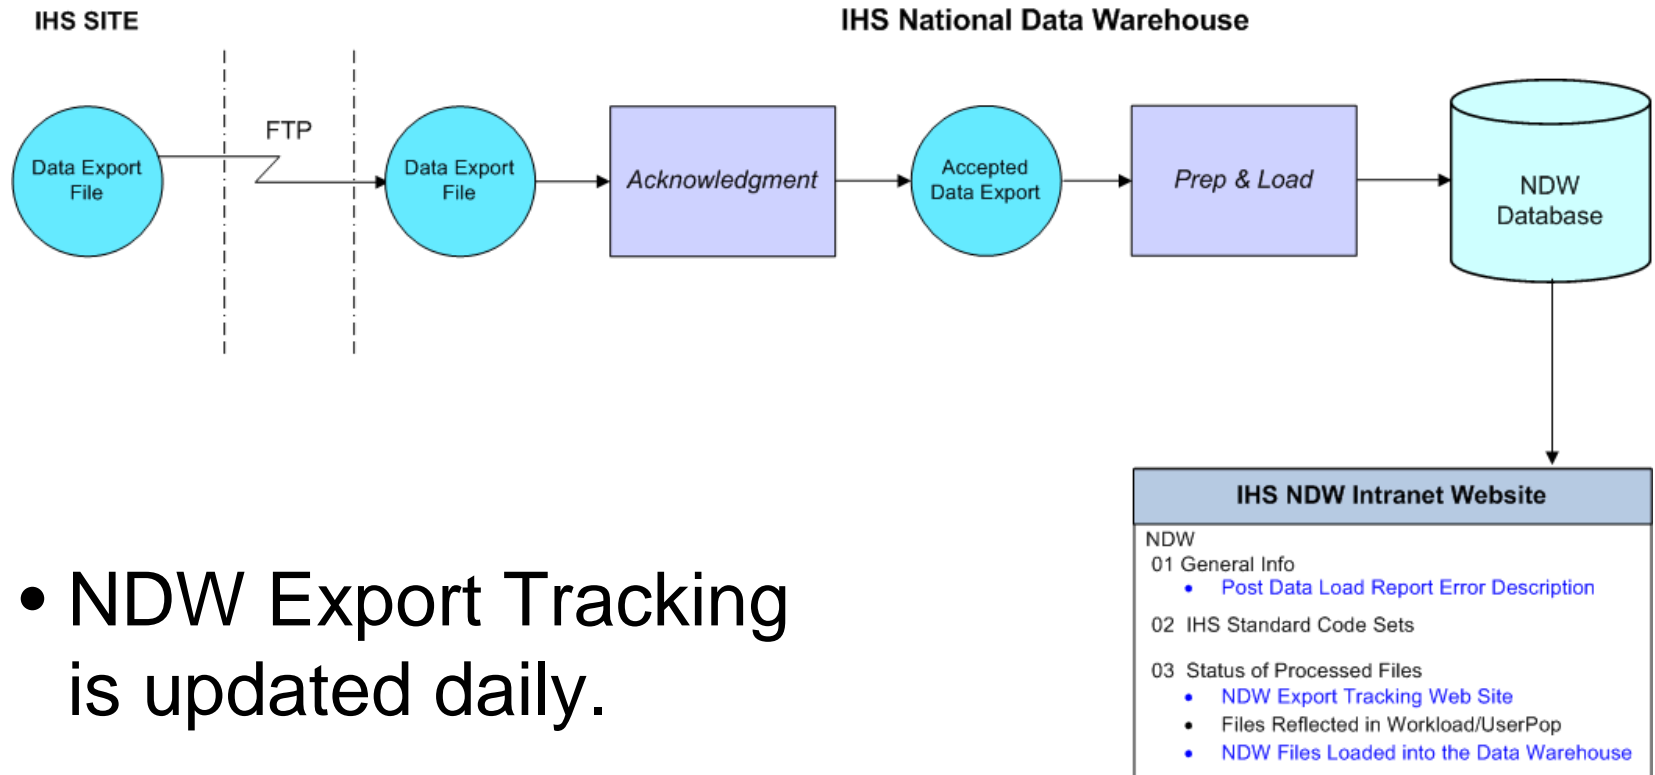

IHS NATIONAL DATA WAREHOUSE
NDW Post Data Load Report
Load Date: 03/26/2007

For more information please send an email to: NDW-ACKREPLY@ihs.gov

Export ID: 5789
Export File Name: 5852813070323061526.BDW
Static ASUFAC of exporting box: 585281
Beginning Date: 02/23/2007

Example of Registration Rejections

The screenshot displays the NDW National Data Warehouse interface. At the top, the logo for 'THE IHS National Data Warehouse' is visible. Below the logo, the page is titled 'NDW Export Tracking'. On the right side of the header, there is a 'Change Error Report:' dropdown menu set to 'Current' and a 'Help' button. The main content area shows 'All Sites of NASHVILLE' and a message: 'You are viewing the CURRENT Load Data. Please click the dropdown to view the INITIAL status'. Below this, a breadcrumb trail reads 'NASHVILLE / All Sites / Export ID 5789'. The results section indicates 'Results 1 - 1 unique records for Export ID 5789' and a 'page size: 20' dropdown. A table with two columns, 'Registration Code' and 'Reason', contains one row with the registration code '137260000001160' and the reason 'NO CHANGE TO NON-EXISTENT REGISTRATION - REJECTING ENTIRE REG'. A page number '1' is centered below the table.

Registration Code	Reason
137260000001160	NO CHANGE TO NON-EXISTENT REGISTRATION - REJECTING ENTIRE REG

Example of Registration Error Description

Error	NO CHANGE TO NON-EXISTENT REGISTRATION - REJECTING ENTIRE REG
Description	The registration record received was flagged as a 'no change,' but the patient does not exist in the database. The record is not stored in the registration tables.
Possible Actions	<p>The registration record must be re-sent as an 'add' to be added to the database.</p> <p>Note: May never have received the 'add' registration record, or exports were sent out of order.</p>

Example of Encounter Rejections

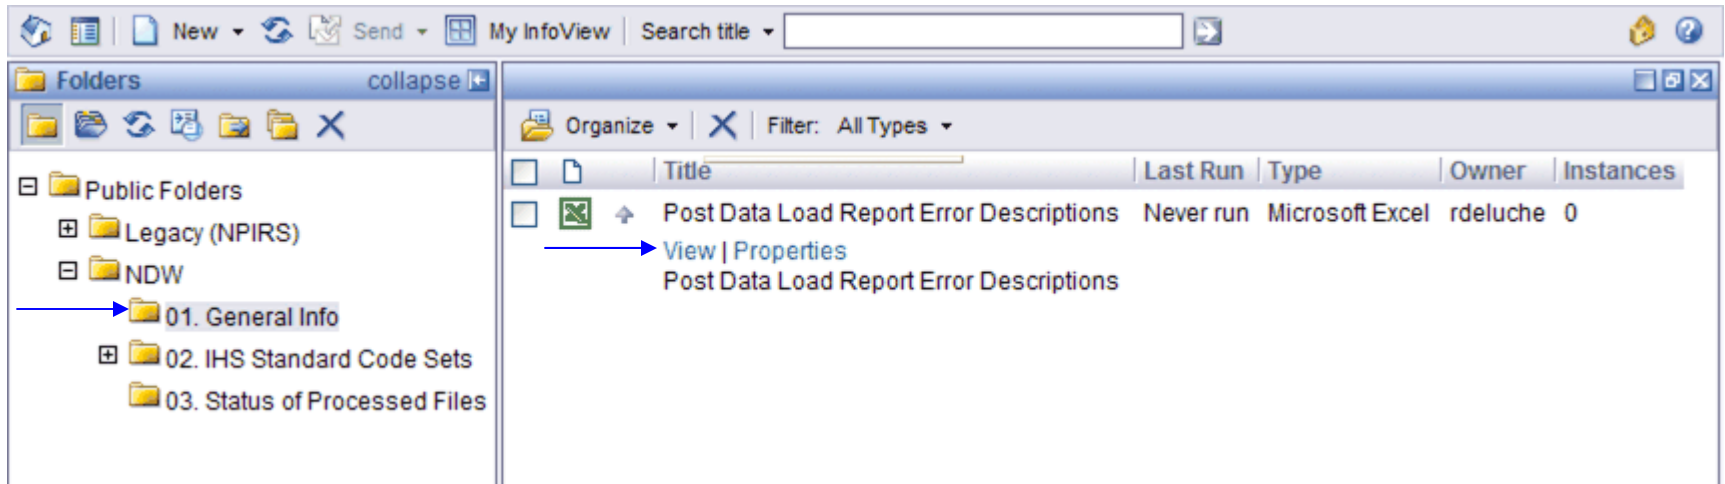

The screenshot displays the IHS National Data Warehouse (NDW) Export Tracking interface. The header includes the NDW logo and the text 'THE IHS National Data Warehouse'. Below the header, there is a navigation bar with 'NDW Export Tracking' and a 'Change Error Report' dropdown menu set to 'Current', with a 'Help' button. The main content area shows 'All Sites of NASHVILLE' and a message: 'You are viewing the CURRENT Load Data. Please click the dropdown to view the INITIAL status'. Below this, a breadcrumb trail reads 'NASHVILLE / All Sites / Export ID 5789'. A status line indicates 'Results 1 - 5 unique records for Export ID 5789' and a 'page size: 20' dropdown. A table with three columns: 'Encounter Code', 'Registration Code', and 'Reason' displays five rows of rejected encounters. All rejection reasons are 'VISIT REG NOT IN DB'. A page number '1' is centered at the bottom of the table area.

Encounter Code	Registration Code	Reason
137260000065486	137260000001161	VISIT REG NOT IN DB
137260000065487	137260000001161	VISIT REG NOT IN DB
137260000065578	137260000001161	VISIT REG NOT IN DB
137260000065579	137260000001161	VISIT REG NOT IN DB
137260000065684	137260000001161	VISIT REG NOT IN DB

Example of Encounter Error Description

Error	VISIT REG NOT IN DB
Description	The encounter record received contained a unique registration code that did not match an existing registration record. The encounter record will be retained pending receipt of a valid matching registration record.
Possible Actions	Check source data and update encounter record with the correct unique registration code
	Note: This could have an affect on workload counts.

Post Data Load Error Descriptions

- To get a copy of the Post Data Load Error Descriptions, click on the **General Info** folder and then click on **View**.
